

University status: Gallaudet meets all the guidelines

by Jerry C. Lee

The Education of the Deaf Act of 1986 (Public Law 99-371) was passed by the U.S. House of Representatives in June, by the U.S. Senate in July, and signed into law by President Ronald Reagan on Aug. 4.

Title One of this law authorizes that Gallaudet College be designated a university. Perhaps it would be helpful to provide a brief summary of the description of and rationale for Gallaudet's change to university status.

While there are no highly specific criteria for describing a university, generally accepted guidelines are well known. These guidelines suggest the following characteristics:

- a community of scholars, students and faculty;
- an organization of schools and colleges for accommodating diverse academic interests and levels of study;
- a strong tripartite commitment to teaching, research and service; and
- a size of student body and a set of financial resources adequate to maintain the scope of activity described in the first three.

Without question, Gallaudet now meets all guidelines for legitimacy as a university. Its programs have been building to this level of size and quality for the past two decades and finally, in recent years, its organizational structure and the management stance of its administration amply conform to university practices.

Let us briefly examine the four guidelines stated above. First, Gallaudet clearly is a scholarly community. Its students come from the upper quartile of deaf high school graduates. Its collegiate faculty of more than 200 individuals have academic credentials which rival that of all but the most prestigious universities. It is recognized the world over as the premier institution of higher education which provides services to hearing impaired persons.

Gallaudet offers programs that are both diverse and comprehensive. It is organized into five schools and colleges: the College of Arts and Sciences, School of Communication, School of Education and Human Services, College of Continuing Education and School of Preparatory Studies.

A School of Management is under development and soon will become the sixth major unit.

continued on page 3

Appearing in "Children of a Lesser God," opening Oct. 3, are (from left) Philip Holmes and MSSD graduates William Byrd, Frank Carter Jr., Georgia Cline and Allison Gompf.

MSSD grads treated royally at world premiere of 'Children of a Lesser God'

Camera flashes going off like fireworks. Movie stars arriving in limousines. A red carpet, reporters, long gowns and tuxedos.

It was everything Allison Gompf imagined a movie premiere would be like.

Gompf was one of the stars arriving in a limousine—a white limousine—for the world premiere of the movie "Children of a Lesser God" at the Toronto Film Festival earlier this month. Gompf and four other former MSSD students in the movie were flown to Toronto by Paramount Pictures.

It was goosebump time—big goosebumps, said Gompf. Now a Gallaudet freshman, Gompf said she loved seeing herself up on the screen, playing a hearing impaired student of a hearing teacher portrayed by William Hurt. Her character, Lydia, is described by Paramount press blurbs as "born to dance and perform."

Reynolds to head Collegiate Faculty; Marshall elected as new vice chair

At its September 22 meeting, the Collegiate Faculty (CF) elected Horace Reynolds, professor of psychology, as its chair. He will also head the Faculty Senate.

William Marshall, professor and chair of the Department of Administration and Supervision, was elected CF vice chair.

According to the revised CF bylaws approved by the Board of Trustees last May, Dr. Reynolds, as CF and senate chair, will preside over all meetings and act as faculty spokesperson. Among

Gompf's mother accompanied her to the premiere. "My mother is very shy," said Gompf. "I had to pull her out of the limousine. She cried when I was on the screen."

Other performers attending the premiere included MSSD graduates Georgia Cline, now a student at Gallaudet's Northwest Campus; Frank Carter Jr., attending the National Technical Institute for the Deaf in Rochester; and William Byrd, now residing in Los Angeles. In the film they portray Hurt's students at a school for the deaf.

"Children of a Lesser God" will open in theaters nationwide on Oct. 3. In the Washington area it will be shown at K-B Cinema, NTI Tysons Center 4 and K-B Montgomery Mall.

For Gompf, Cline, Carter and Byrd, and for people who have known them here, the opening of the film will be an exciting, exhilarating time.

Goosebump time.

other duties, Dr. Reynolds will also coordinate the functions of the CF standing committees and the undergraduate, graduate and preparatory studies legislative councils.

As vice chair, Dr. Marshall will preside at CF meetings in the absence of the chair. His other duties include serving as faculty liaison to the Board of Trustees, chairing the committee on Academic Standards and Admissions and serving as a senator.

The next CF meeting is scheduled for Oct. 6.

Student retention study offers profile of typical dropouts

First of a two-part series

Student retention, an issue of growing concern in academic institutions nationwide, has become an increasingly important area of scrutiny at Gallaudet as well.

By the fall of 1985, 34 percent of the 1,374 undergraduates who had enrolled at Gallaudet a year earlier had left without completing their courses of study. The number of students receiving baccalaureate degrees in 1985 was 43 percent of those who originally enrolled in the Class of 1985. For the Class of 1986, that percentage dropped to 38 percent.

Such statistics spurred President Jerry C. Lee to order a study conducted by the Center for Assessment and Demographic Studies (CADS) of the Gallaudet Research Institute. Dr. Lee also formed a Task Force on Student Retention to analyze attrition patterns and methods of improving retention.

The results of both efforts, presented recently, offer a variety of challenges to Gallaudet's administration, faculty and staff. Part I of this series will examine the problem of student retention as noted in the CADS report, while Part II will look at proposed means for resolving the situation based on the findings of the task force. Other articles will follow in the next year.

The purpose of the CADS study was to track and understand the attrition rate at Gallaudet, providing information to formulate more effective strategies to retain qualified students.

Statistical "snapshots" of the Gallaudet undergraduate population developed for October 1984 and October 1985 were examined; students who had left the College sometime during the 1984-85 academic year were surveyed; and all academic advisors of 1984-85 preps and freshmen were interviewed.

An overview of the report cautions that the study examined attrition over a specific period of time that corresponded to the height of the "rubella bulge," when many new students had to be accommodated at one time. The overview also notes that the study was conducted during a time of transition at the College, including changes in admissions procedures and the student advisement program.

A summary/discussion at the conclusion of the report points out that "Gallaudet by its very nature has as its

continued on page 2

Withdrawals preventable, says study

continued from page 1

primary constituency students who would be labeled as 'high risk' by most other postsecondary institutions. It is therefore not surprising that many students do not finish a degree program," the report states. "Given the special population Gallaudet is mandated to serve, comparisons of its attrition rate with other institutions' rates probably are not very instructive."

But, the report continues, "Perhaps the more relevant question is whether there were students among the 34 percent [who withdrew] who could have been served appropriately by the College and whose withdrawing could have been prevented. The data from this study suggested strongly that there may be a significant number of such students."

The vast majority of the withdrawing or academically dismissed students were classified as preps or freshmen. Among new freshmen, the withdrawal rate was 42 percent. Provost Catherine Ingold has called this figure "ghastly," saying, "We appear to be losing a significant number of our strongest students."

Analysis of survey data from 242 withdrawing or dismissed students indicates that the most commonly cited reasons for leaving were academic dismissal (26 percent), financial problems (22 percent) and insufficient college readiness or motivation (22 percent).

An average of 20 percent of the time, according to the report, "respondents cited reasons which have been facetiously labeled the 'bitch factor.' These respondents tended to place blame for their withdrawal on the College—they didn't like the courses, the professors, or the food." Sixteen percent of the students responding said they wanted to go to a different school.

A steady increase in attrition rates was noted according to the distance from the student's home to Gallaudet, with students from the West about 1.5 times more likely to leave than students from the Northeast.

Males were more likely than females to indicate financial problems as a cause for leaving. Academic dismissal was a reason given more often by freshmen than by preps or upperclassmen; financial factors were cited less often by upperclassmen than by preps and freshmen. Freshmen were also the most likely to blame their leaving on the College's programs, teachers, food and other such "bitch" factors.

Black students cited academic dismissal, financial problems and complaints about the College and its services more frequently than white students.

While there was no evidence that degree of hearing loss was related to retention status, the study found that withdrawing students with less-than-severe hearing losses were more likely than other students to cite financial problems as a reason for leaving. "This may indicate," the report says, "that these students had trouble convincing VR and other agencies that Gallaudet is an appropriate placement for them."

And finally, the results suggest that residential school graduates were more likely to state they were academically dismissed and to attribute their problems to lack of readiness for college or to lack of direction. Withdrawing students who had been mainstreamed in high school were more likely to say they left because of perceived inadequacies of the College and its programs.

Academic advisors had very different perceptions about why individual students left, the study found. The ten reasons most commonly stated by the advisors were academic in nature. Students, on the other hand, frequently cited problems such as food and dorms, social life, finances and inadequacy of support systems.

In general, advisors remembered returning students better than withdrawing students; they met less frequently with students who later withdrew; they felt that withdrawing students were more likely to break appointments without notification; and they estimated that they spent less time with the withdrawing students.

What can Gallaudet do to retain more students? Part II will look at that question.

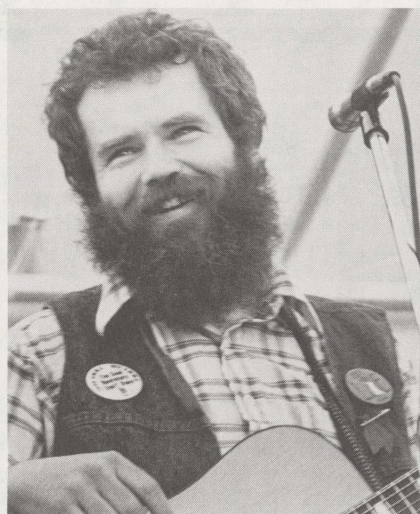

Graduate wins award

Elmer Hayes, a 1970 Gallaudet graduate, has been selected as co-winner of the award for Outstanding Handicapped Federal Employee of the Year.

Hayes, a chemist at the Environmental Protection Agency, has maintained strong ties with the College and MSSD. He has participated in events such as the Careerathon and science fairs, and has had periodic speaking engagements on campus. His wife, Sharon, works in the Office of Student Life.

Hayes and other award recipients will be honored at a ceremony on Thursday, Oct. 9 at the Department of Commerce Auditorium, 14th Street at Constitution Avenue NW, in Washington. Reservations should be made by Oct. 3 by calling Jon Hackbarth or Ann Principato at the Career Center, x5270.

Transportation from Gallaudet to the auditorium will be arranged if there is sufficient interest. The ceremony will be interpreted.

Singers Charlie King (above) and Judy Small will perform in a concert interpreted by Janet Bailey Oct. 30 at 8 p.m. at the New York Avenue Presbyterian Church. Tickets will be available from Oct. 1 at the Student Union for \$6, or at the door for \$8.

Applications still accepted for dean

The new deadline for applications and nominations for the position of dean of the College of Arts and Sciences (CAS) is Friday, Oct. 3. This represents a one-week extension of a previously announced deadline. The application period was extended due to late printing and delivery of a memo setting a deadline of last Friday.

Provost Catherine Ingold also announced that four CAS faculty members will serve on a dean interview committee. They are John Van Cleve (history), Gerald Daly (physics), Nancy Kensicki (English) and Janet Pray (sociology and social work).

Announcements

The Gallaudet chapter of Kappa Delta Phi honor educational society, will hold its fall meeting Sept. 30 at 7 p.m. in Ely Auditorium. Jay Rochlin, executive director of the President's Committee on Employment of the Handicapped, will speak on "Increasing Employment Opportunities for Hearing Impaired Persons: What Can Professionals Do?"

The deadline for nominations of representatives to the Staff Advisory Committee for 1986-88 is Oct. 1. The general election will be held Oct. 14.

An open meeting of the President's Council on Deafness (PCD)—formerly the Deafness-Related Concerns Council—will be held in "Ole Jim" Oct. 2 from 4 to 6 p.m. The meeting will be followed by a "Happy Hour." Among topics scheduled for discussion are communication access, deaf employment and deaf studies.

Anyone wishing to contact the Physical Education Department should call x5591. The number for the Department of Athletics is x5206.

The second annual Conference on Microcomputers, scheduled for Oct. 7 through 10 at the Greenbelt Hilton Hotel, has been cancelled.

Fiber-optic strands speed registration

One feature of registration for fall classes this year was something invisible to everyone who participated: a new fiber-optic link between Elstad Auditorium and the VAX computers in EMG Building.

The link is composed of two glass strands. Each strand is approximately the size of a human hair. The link is part of a new high-speed campus "Ethernet" computer network.

The link was rushed to completion to ensure timely response at each of the 14 computer terminals used to support the academic portion of the registration process in Elstad. Prior to the completion of this link, Elstad was not connected to the campus computer network.

For a person in the proper place with the proper equipment, the data flowing between Elstad and EMG would have been visible. The data moved as packets of light through the glass strands connecting the buildings. One strand carried light signals from the computer to the terminals in Elstad and the other carried light signals from the terminals to the computer in EMG.

The term "high speed" is appropriate. The new network moves information at 10,000,000 bits per second, or more than 1 million alphanumeric characters—equivalent to a book with nearly 400 pages of text—per second.

Because the network is shared, however, any one user would probably be "limited" to only 40 pages of text per second. This rate is approximately 1,000 times faster than the previous communication rate.

The major links are now in place throughout the campus for a complete Ethernet network. Currently College Hall, Chapel Hall and Fowler Hall are connected to EMG by coaxial cable. Elstad, the Merrill Learning Center and MTB are connected to EMG by fiber-optic links. HMB will shortly be tied to EMG by a fiber-optic link.

Fiber-optic links are already in place underground between EMG and Denison House, the Central Utilities Building, MSSD and KDES. Additional equipment will be required to permit the completion of the latter links.

Gallaudet is the first university in the Washington area to make use of fiber-optic technology for campus computer communication purposes. Fiber-optic cable will provide the communications backbone for all major computer applications, as well as Local Area Networks (LANs) and connections to departmental computing resources. In addition to campus applications, the technology supports BITNET communication with other universities in the United States, Canada and Western Europe.

Gallaudet's electronic card catalog for the library is the most recent major application of fiber optics. The fiber-optic connection to the Merrill Learning Center, put into operation last week, will permit the activation of 12 new terminals and several printers to support library patrons.

During the past summer more than 4 kilometers of fiber-optic cable were installed in underground conduits throughout the campus. Lloyd Ballinger of the Networks Department of Computer Services supervised the installation and testing of the network.

Gallaudet College is an equal opportunity employer/ education institution. Programs and services offered by Gallaudet College receive substantial financial support from the U.S. Department of Education.

33 faculty proposals receive funding under 1986-87 Presidential Awards

President Jerry C. Lee last week approved 33 faculty proposals for funding under the Presidential Awards program.

The program, now in its third year, is designed to stimulate interest among College and PreCollege faculty in identifying and developing projects that enhance academic programming.

The following is a list of this year's Presidential Award recipients and their project titles. In some cases other faculty members will be involved in addition to the project directors listed here.

College of Arts and Sciences

- Paul Cunningham: Biology Faculty Proposal to Develop an Investigative Laboratory Course.
- Russell Olson: Writing Across the Curriculum.
- Trenton Batson: ENFI Project.
- Shirley Shultz: Intercollegiate Academic Enrichment.
- Samuel Trychin: Coping Strategies for Hard of Hearing Adults and Their Families: A Training Program for Facilitators of Consumer Groups.
- Jane Dillehay: Insight.
- Margaret Walworth: NTID/Gallaudet Workshop on Teaching English.
- Susan Anthony: Update the Social Psychology Introductory Text.
- Frank Zieziula: Continuation of Community Counseling Services for the Hearing Impaired.
- Allen Sussman: Mental Health and the Deaf Postsecondary Student.

School of Education and Human Services

- Philip Schmitt: A Videotape Series on Hearing Impairment.
- Robert Westermann: A Study Table for Student Athletes at Gallaudet.
- Donna Mertens: Preparation for a Career in Evaluation Research II.

School of Communication

- Mary Jane Moseley: A Graduate Degree Program in Speech/Language Pathology with Specialization in Aural Rehabilitation.
- Ken Tikin: An Assessment of the Communication Arts Program.
- Barbara Williams: Cued Speech Research in Language Competency in Deaf Children Who Use Cued Speech.

SOCAP auction slated

The 2nd Annual Charity Auction to benefit Gallaudet, sponsored by the D.C. Chapter of the Society of Consumer Affairs Professionals in Business (SOCAP), is slated for Thursday, Nov. 20 from 6 to 9 p.m. in the NRECA Building, 1800 Massachusetts Ave. NW, Washington.

Anyone with an item to donate for auction should contact Don Pettingill in EMG 204, x5006, as soon as possible.

Last year, diverse items were auctioned such as a \$3,000 Caribbean cruise and several weekends in Ocean City condos.

Pettingill pointed out that, because of the new endowment fund established under the Education of the Deaf Act, the federal government will match money raised from events such as the auction. "Thus," he said, "any donation you make, be it auction items or cash, will be worth twice as much."

A donation of \$10 will be asked of those who attend the auction.

- Sally Revoile: Hearing Impaired Adults and Their Use of Cues for Speech Perception.

Gallaudet Research Institute/CSEHD

- Thomas Kluwin: Establishment of a National Research and Development Network of Public High School Programs for the Hearing Impaired.

School of Preparatory Studies

- Eileen Matthews: Development of Associate in Applied Science Degree Programs.
- David Alexander: Task Force on Academic Advisory: Academic Advisement Program for SPS.
- Hilary Ainbender: Integrating Software into the English Curriculum.
- Eleanor Hillegeist: Computer Network System Use in Teaching Mathematics.
- Felicia Alexander: SPS Summer Institute.

PreCollege

- Rachel Harris: Handbook on Deafness for Elementary Programs Serving the Deaf.
- Frank Rupert, Reginald King and Charles Linnell: Computer Aided Drafting.
- Jim Barrie: Survey Course of American History.
- Richard Lytle: Social/Emotional Development Assessment Instrument.
- Sandra Hart-Davis: Public Domain Software.
- Debra Nussbaum: Training Packet on the Concept of Hearing Loss.
- Marcine Thomas: Lending Library of Support Materials for Mainstream Programs.
- Jinny Johnson: Automated Circulation System for the LRC at KDES.
- Dale Ford: Day-School Computers Programs.
- Beth Benedict: Paraprofessional Programs.

Spirit Club seeks wave enthusiasts

The Homecoming '86 Spirit Club needs bodies to fill T-shirts and be part of the signing-yelling wave on homecoming-afternoon Oct. 25.

Everyone is invited to join the club. The only requirements for membership are a willingness to buy a T-shirt and to attend two practice sessions where the cheerleaders and their sponsors will teach the chants.

Spirit Club practices will be held from 5:30 to 6:30 p.m. at the bleachers on Oct. 6, 7, 13 and 14.

The T-shirts will cost about \$5 and will be sold during that same hour and location on Oct. 20 and 21.

Anyone with questions or suggestions can call or visit Gina Oliva, x7515 (TDD) or x5510 (V/TDD), or leave a message at x5591.

Who's 'Mr. K. Green'?

Computer Services recently received a backup disk for the Print Shop. It was addressed to Kendall Green, and the software company thought that was the person's name.

If you recently ordered this backup, contact John Millikin in User Services, x5273, HMB 118, to claim it.

Zan Lee dejectedly leaves the Athletic Office upon learning he must gain a little weight and grow a few inches before he can try out for the Gallaudet football team.

You & Your Job

Several employees have inquired about the recently enacted Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA). This offers a temporary extension of health insurance coverage for up to 18 months for employees and their families following separation from a program. Employees under federally sponsored programs, including those at Gallaudet, are not covered by the act.

Gallaudet employees will soon be receiving information regarding the new Federal Employees Retirement System. All employees hired on or after Jan. 1, 1984 will automatically be covered by this program. Employees under the old CSR plan will have an opportunity to switch to the new program if they so desire. Employees are asked to read the information carefully and contact the Personnel Office with any questions.

Gallaudet qualifies to be a university

continued from page 1

The College of Continuing Education operates five regional centers around the country as a means of providing extension and outreach services to the national deaf community. The College also operates two national demonstration schools, the Kendall Demonstration Elementary School and the Model Secondary School for the Deaf. These two schools function as service providers to approximately 600 students from kindergarten to grade 12, and as a laboratory for research, development and demonstration.

A true university has a tripartite commitment to teaching, research and service. Gallaudet offers degrees from the level of associate of arts through the PhD level. Its graduate program in teacher education spans almost a century. The Gallaudet Research Institute, which is organized into four major centers, conducts the world's most extensive deafness-related research. Gallaudet's Learning Center has the largest existing collection of print and other visual materials on deafness as well as other extensive collections to serve its diverse instructional and research needs.

Gallaudet provides not only the usual on-campus and community service activities expected of a university, but also, through its regional centers, Information Center, International Center, Center for Law and the Deaf and other networks, provides outreach services worldwide.

In size of operation Gallaudet is within the scope of a medium-sized university. Its student body of approximately 2,600—plus the many thousands served by one-time or short term activities—is somewhat small by state university standards, but very large when the necessary accommodations for deafness are taken into account. The need for small classes and a large cadre of academic and student support personnel makes relative student body sizes an unequal comparative measure between education program for deaf persons and hearing counterparts.

Gallaudet's two campuses with some 40 buildings and well over two million square feet of space exceeds the

physical size of many universities. Likewise, its annual budget of approximately \$70 million is well within the range of other universities.

For 127 years Gallaudet has occupied the forefront of higher education for deaf people throughout the world—a position earned through diligence and quality of graduates. It is estimated that two-thirds of the deaf persons in the world who hold bachelor's degrees received them from Gallaudet.

By any standard of recognition, Gallaudet deserves to take its place among the respected universities of the world and, in so doing, pledges to uphold all those standards and levels of service which are implied by university designation.

'Love is Never Silent' wins 2 Emmy awards

"Love is Never Silent," the Hallmark Hall of Fame production starring Gallaudet graduates Phyllis Frelich and Ed Waterstreet and co-produced by Gallaudet graduate Julianna Fjeld, received two Emmys during the 38th annual awards ceremony on Sept. 21.

The movie, shown on NBC television last December, upset the highly acclaimed "Death of a Salesman," starring Dustin Hoffman, to win the top award for a drama or comedy special. The movie's director, Joseph Sargent, also received an Emmy for best direction in a mini-series or special.

Frelich had been nominated for best supporting actress in a mini-series or special for her role as Janice Ryder in the film; Colleen Dewhurst won that award for "Between Two Women." Mare Winningham, who played Frelich's hearing daughter in "Love is Never Silent," was nominated for best actress in a mini-series or special; Marlo Thomas got the Emmy for her role in "Nobody's Child."

A committee is a group of people who individually can do nothing but collectively meet and decide that nothing can be done.

—Gov. Alfred E. Smith

Among Ourselves

A review of Thomas Landers' book, "Management und Verwaltung—Theorie und Praxis," published by Nomos Verlagsgesellschaft, Baden Baden, Germany, appeared in the April issue of *Dirigenti Scuola*, an Italian professional journal. Landers is a professor in the Department of Administration and Supervision.

Gilbert Delgado, the College's international development officer, recently addressed a colloquium at Boys Town Institute in Omaha. Delgado spoke on the changing demography among the general and hearing impaired populations and its implications for professionals.

T. Hoy Booker, assistant professor of mathematics and computer sciences, presented a paper on "The Cyclic Jacobi Algorithm for Symmetric Matrices with an Unbounded Angle of Rotation" at the recent International Congress of Mathematicians held at the University of California, Berkeley.

Harvey Goodstein, professor of mathematics and computer sciences and director of the NSF Summer Institute at Gallaudet, and Chuck Dietz, mathematics instructor at MSSD, made presentations at a "Weekend with the Experts" conference for Florida educators of hearing impaired students earlier this month. Dietz presented "Understanding Understanding Mathematics" and Goodstein presented "Language and Mathematics Development in Deaf Education." The two also conducted a workshop on "Problem Solving."

Goodstein talked with educators of hearing impaired students in Fort Myers. Later he visited the Florida School for the Deaf and Blind and presented the "Problem Solving" workshop.

Sponsored R&D

Provided below are application deadlines of selected programs that offer potential grant or contract opportunities for faculty, staff and graduate students. More details on these and other programs of interest can be obtained from the Office of Sponsored Programs, x5401 (V/TDD).

Deadline	Program
Open	Spencer Foundation: Small Grants
10/14/86	ED/OSERS: Synthesis Validation and Dissemination of Research Methods for Mainstreamed Settings
10/14/86	ED/OSERS: Field-Initiated Research Projects
10/24/86	ED/OSERS: Research for Educating Seriously Emotionally Disturbed Students
10/31/86	ED/OSERS: Preparation of Personnel to Work in Rural Areas
10/31/86	ED/OSERS: Preparation of Personnel to Provide Special Education and Related Services to Newborn and Infant Handicapped Children
10/31/86	ED/OSERS: Preparation of Personnel for Minority Handicapped Children
10/31/86	ED/OSERS: Training Personnel for Education of the Handicapped—Preparation of Personnel for the Transition of Handicapped Youth to Adult and Working Life

The Gallaudet soccer team, coached by Patrick Atuonah (center), is off to a flying start with a 3-0 record through Sept. 20. Atuonah, captain of the 1978 and '79 Bison soccer teams, recruited a strong team of 22 players from 6 states and 7 countries in his first year as head coach.

Football team to host Anne Arundel

After two weeks on the road, the Gallaudet football team returns to friendlier turf this Saturday, Oct. 4, when it hosts Anne Arundel Community College. Kickoff is at 1:30 p.m.

Anne Arundel defeated visiting Gallaudet last year, 29-13, and holds an 11-2 advantage over the Bison in a series that began in 1972.

"If we are going to win, we have to stop the passing attack of Mark Ray and score more than 20 points," said Head Coach Bob Westermann. Ray, rated one of the best junior college quarterbacks in the nation, threw for

three TDs in Anne Arundel's 21-20 victory over Georgetown earlier this month.

Gallaudet's 9-3 loss at Stevens State Tech on Sept. 20 wiped out an otherwise spectacular day for Bison quarterback Jimmy Segala. The freshman signal-caller completed 20 of 35 passes for 234 yards.

Segala was sacked five times, however, and the Bison also turned the ball over five times, including one fumble inside the Stevens State 10-yard line. The Gallaudet backfield was held to 33 yards on 31 carries.

Wanted: Just the facts on FBI chief

Did former FBI director J. Edgar Hoover have deaf parents? Did Hoover know sign language or fingerspelling?

Simon J. Carmel, a researcher on deaf folklore, would like the assistance of *On the Green* readers in trying to separate fact from rumor.

Deaf people in several different states have informed Carmel that Hoover had deaf parents and that he knew how to sign. But sources at the FBI headquarters in Washington have told Carmel they have no information to support either claim.

The "FBI file" on Hoover indicates only that he served as honorary director of the Alexander Graham Bell Association for the Deaf from 1952 to 1972 and that his great uncle, a

secretary to and friend of A.G. Bell, served as the first superintendent of the Volta Bureau/A.G. Bell Association.

Any person who met or knew Hoover's parents and can verify their deafness, or anyone who witnessed Hoover using sign language, is encouraged to write by mid-October to Simon Carmel, 10500 Rockville Pike—#1028, Rockville, MD 20852. Carmel can also be reached by calling (301) 493-6419 (TDD) before 11 p.m.

Channel 33

Channel 33, the Gallaudet cable television channel for special events, sports, news, education and entertainment, will air the following programs this week from 9 a.m. to 5 p.m.

9-9:30	Beyond Sound: Ear Implants
9:30-10	Deaf Mosaic #12
10-10:30	Beyond Sound: Deaf Inmates
10:30-11	Music Seen #3
11-11:30	Deaf Mosaic #205
11:30-12	Deaf Mosaic #202
12-12:30	Deaf Mosaic #206
12:30-1	Deaf Mosaic #204
1-1:30	Deaf Mosaic #206
1:30-2	Deaf Mosaic #203
2-2:30	Music Seen #4
2:30-3	Music Seen #5
3-4	That Makes Two of Us
4-5	If You'd Only Listen
